

Illustrative sample. Generated from synthetic, lms-shaped data to demonstrate the report layout — these are **not** live Drupal.org figures, and the contributor names are fictional. Run `python3 dorg_stats.py lms` for the real report.

DRUPAL.ORG ISSUE-QUEUE COMPARISON

LMS vs Opigno LMS

■ LMS · 724 issues · 12.0 years old

■ Opigno LMS · 468 issues · 11.0 years old

Scorecard

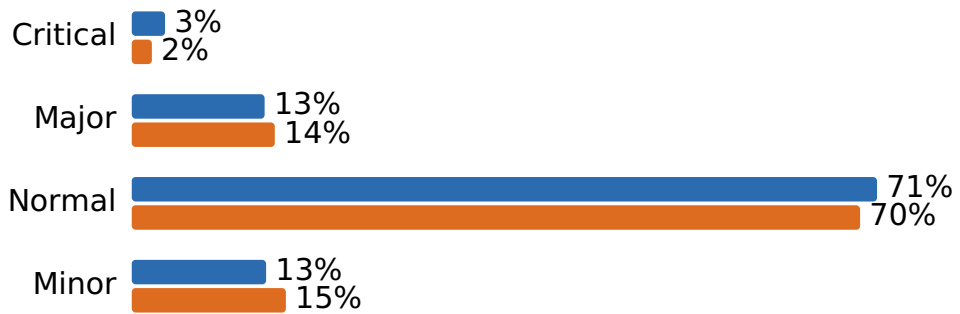

Best value highlighted only where a metric has an unambiguous direction. Volume metrics are left neutral — more issues isn't inherently better or worse.

METRIC	LMS	OPIGNO LMS
Total issues	724	468
Open / unresolved	297	250
Resolved / closed	427	218
Median time to close (lower better)	19 days	32 days
Median age, open issues (lower better)	6.0 years	6.4 years
Avg comments / issue	6.0	6.4
Active in last 90 days (higher better)	26%	34%
Open & stale > 1 yr (lower better)	10%	6%
Open vs. legacy/EOL branch (lower better)	54%	72%
RTBC backlog — median age (lower better)	54 days	55 days
Needs-review — median age (lower better)	47 days	3.1 months
Unique issue authors	20	20
Author concentration (Gini) (lower better)	0.48	0.49
Top-3 author share (lower better)	45%	46%
Project age	12.0 years	11.0 years

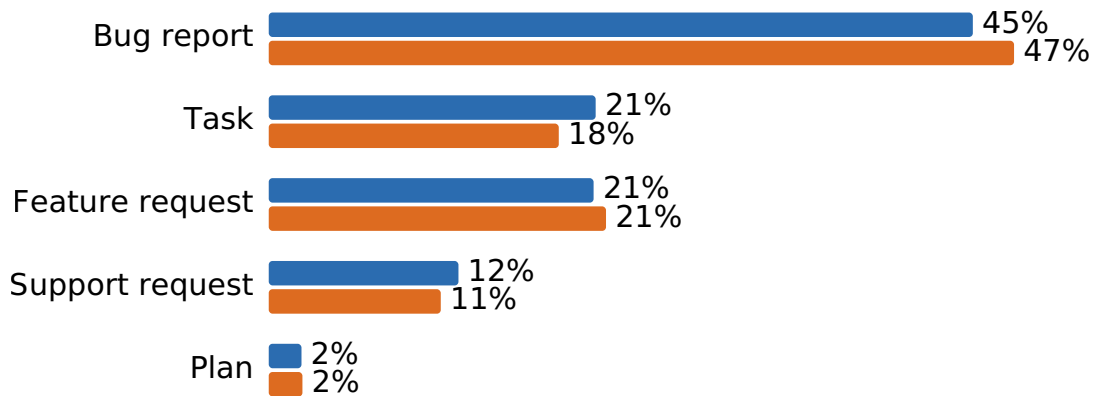

Queue shape

Distributions as a share of each project's own issues, so you compare character rather than size.

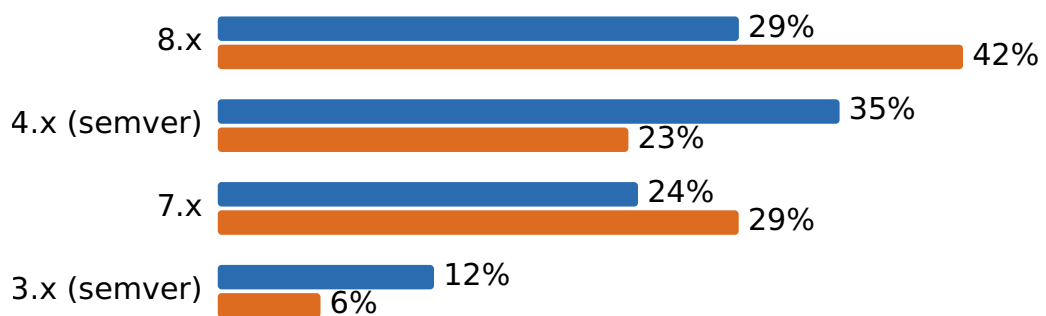

BY PRIORITY

BY CATEGORY

BY CORE BRANCH

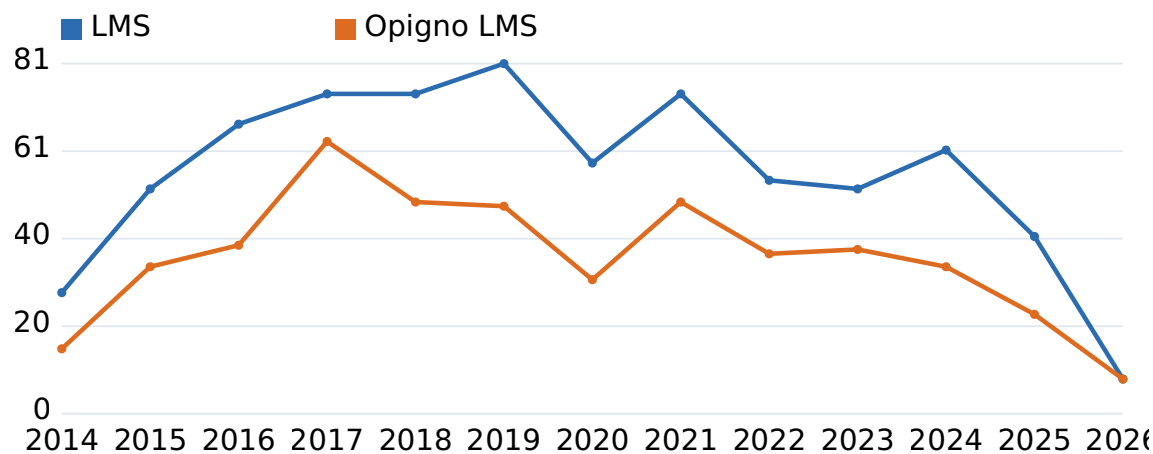

OPEN VS. RESOLVED

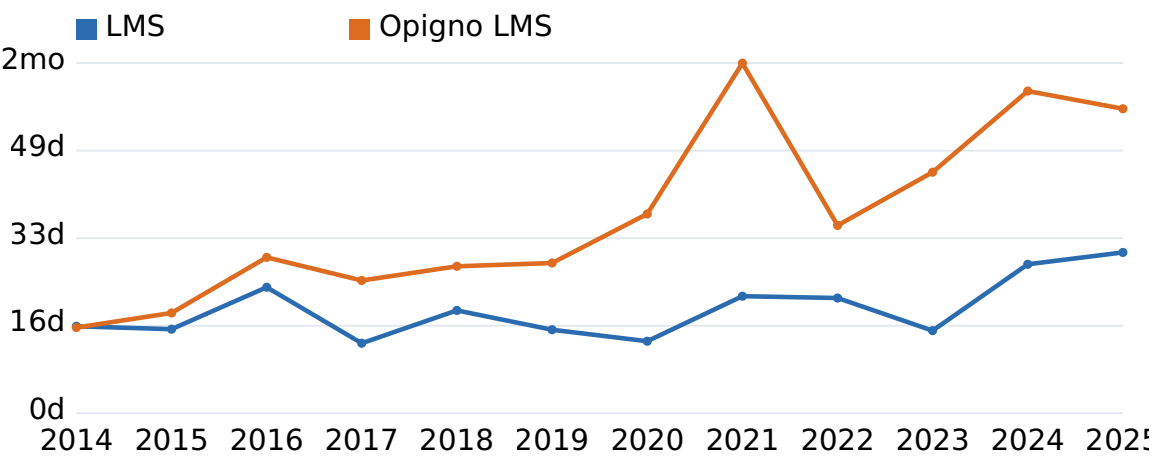

Activity over time

Issues opened per year (raw counts).

Resolution-time trend

Median days to close, by the year each issue was opened (cohorts of 4+ resolved issues).

Top contributors

RANK	LMS	OPIGNO LMS
1	lms_maint (132)	lms_maint (95)
2	amelia_dev (110)	amelia_dev (69)
3	drupalcrafter (87)	drupalcrafter (50)
4	quietfix (70)	quietfix (41)
5	moduleminder (42)	node_nomad (28)

Contributor overlap

How much the projects share the same people — a map of the maintainer ecosystem around them. Based on issue authors.

SHARED ISSUE AUTHORS

Diagonal = total unique authors; off-diagonal = authors in common (with Jaccard overlap).

AUTHORS	LMS	OPIGNO LMS
LMS	20	20 (100% Jaccard)
Opigno LMS	20 (100% Jaccard)	20

PEOPLE ACTIVE ACROSS ALL 2 PROJECTS

CONTRIBUTOR	TOTAL ISSUES	PER PROJECT
lms_maint	227	132 · 95
amelia_dev	179	110 · 69
drupalcrafter	137	87 · 50
quietfix	111	70 · 41
node_nomad	68	40 · 28
moduleminder	64	42 · 22
patchwork	50	24 · 26
sunny_qa	48	25 · 23
edge_caser	47	28 · 19
scope_creep	46	36 · 10
rtbc_rita	38	18 · 20
twig_tinker	35	23 · 12

Best-effort metrics (raw, side by side)

Not in the scorecard because their accuracy is limited by what the API exposes — compare with caution.

METRIC	LMS	OPIGNO LMS
Issues with attached files	300	185

How to read this. Distributions are normalized to each project's own total so a larger queue doesn't dominate. Highlights mark the better value only for metrics with a clear direction; there is deliberately no single 'winner', since which metrics matter depends on why you're comparing. The same methodology caveats as the single-project report apply (close-time proxy, branch-posture heuristic, sampled reopen rate).
